Aesthetics Section

18/04/2013

Been mulling over some kind of aesthetics you'd like to see materialize? Well, don't hesitate to upload a photo with your wishes and we'll do our best to create prototypes from it. All this is thanks to a new section we'll be launching which will allow users to obtain aesthetic plates quickly and easily direct from the Maierinnovation web site.

However, this new service is much more, since it's also a virtual repository where we will periodically be putting forward our own aesthetics, with the possibility of reserving any item with a single click. Afterwards we will contact the user to deliver the sample as quickly as possible.

If you'd like a personalized request just click "Create your own Sample". From there you can send us an image (adapted or not to the Maier plate) so we can make an interpretation based on this.
