Latest Launched Cars in Europe

04/05/2012

Among the latest cars introduced in the European market, Maier supplies decorated parts for the Citroën DS5, Dacia Lodgy and Peugeot 208.

The highlighted Citroën DS5 mounts the following parts developed, injected and chromed at Maier facilities: bonnet mouldings (sabres), front grille emblem, door mouldings and front mouldings. The fuel tank cap is another exterior part supplied by Maier. Inside the cockpit we can find the IMD mouldings on the central console, also developed and manufactured by Maier.

For the new MPV Dacia Lodgy, Maier supplies two references of wheel covers and the fascia.

Maier also supplies different parts for the Peugeot's best seller: the interior speaker supports, the 15" wheel covers (types A & B and the bi-colour version), the chromed covers for the mirrors, the black chromed mouldings on the front bumper and the innovative roof/windscreen chromed moulding.
