MAIER INNOVATION – INTERIOR DOOR HANDLES

Vehicle interior aspect and comfort is one of the most important factors when choosing a vehicle without forgetting exterior style likewise reliability and durability.

Vehicle interior is a subjective business where each user (clients, car manufacturers, designers, engineers,..) present different alternatives. However, when choosing there is a series of specific elements on which all coincide: comfort, material durability, minimal noise, wide spaces, style and decoration.

The inside door handle is part of the strategic products available for door panel together with loudspeaker grilles, trims, etc., and is MAIER's clear determination for the future.

Maier, as expert supplier of automatic plastic parts with a preference for complete automotive developments, providing innovative solutions regarding product and process with a wide
